Photography

Ask yourself which of the images below is more appealing.

Almost every wedding photographer will use equipment, which yields results similar to the image on the left. This is largely due to the ease and simplicity of the technique/equipment, which allows them to get away with acceptable results. As per the image on the right, we prefer to create appealing light for every wedding we are involved with. Using small and compact studio lights we can transform any and all rooms into beautifully lit studios.

Even if your ceremony is in a cave, we'll light it.

Does this even matter? We believe yes. We've studied light and we know how it works. We know we can make it work for you. Before lenses, megapixel, filters, Photoshop there is light; without light there is no photograph.

What is most important when choosing a videographer?

In one word: Experience. Too many people in this business get started in video production by doing weddings.

Do you want to trust your once in a lifetime moments to someone who is just learning? Making mistakes is inevitable when learning anything new, and it can take years to get it right. Always go with Experience. At AV7 Weddings we have been in the "Professional video" market for years, filming everything from feature length movies, television shows for broadcast TV, live concert events and most importantly Weddings! When experience counts call AV7 Weddings you will not be disappointed.
